New Mexico State University

“Place Matters”

Hans Butzer
Director of Architecture and Mabrey Presidential Professor of Architecture and Urban Design, The University of Oklahoma College of Architecture

Having established their presence in Oklahoma through their design of the Oklahoma City National Memorial, Hans and Torrey Butzer continue to explore issues of local identity and place through their shared architectural practice Butzer Gardner Architects, and through Hans's teaching at the University of Oklahoma College of Architecture. The lecture by OU Division of Architecture Director Hans E. Butzer will explore the notion of "slow architecture" through three primary examples of architectural projects in Oklahoma. Slow architecture explores how local physical and cultural conditions can shape sustainable interventions of place-making for people.

Sarkeys Energy Center (SEC) A235
October 25 at 3:30 pm
All seminars will begin with coffee & socializing at 3:15
